DA BOGDAN, NOSTRO REFERENTE

Today I am going to Tsurupinsk again. I will meet with the director of a professional school where many orphans go after they leave the orphanages. Out of 300 students in this professional school 80 are orphans. Maybe we can help them build a new workshop or invest in the professional training of orphans in some other way (tools, exchnage with some Italian professional school or something else?). Thank you for your willingness to continue helping. There are many needs. I hope I can find a new orphanage where we can do a project.
Bogdan

Tsurupinsk Children's Home

Attention: President of Children Future Project Onlus
Mr. Andrea Bianco

Dear Mr. Bianco,

The administration of Tsurupinsk Children's Home would like to ask for your kind assistance in resolving a problem that is very important to the health of our children and that requires immediate attention.

Every autumn all residents of the Tsurupinsk Children's Home receive government-funded vaccination against influenza. Such vaccination is very important to our children, as they all have severe physical and mental disorders, and very low immune system. That is why all illnesses take serious forms in our children and present a great risk to their health, with serious complications. It is for this reason that the World Health Organization, as well as Ukrainian doctors, classify such children as a 'high risk group' and recommend that they receive obligatory immunization against flu.

Unfortunately, this year our authorities were unable to provide funds for purchasing the vaccines because of the economic crisis. Our children's home does not have sponsors that could pay for the vaccines, nor do we have time to look for such sponsors as the flu epidemic is expected in mid-December or at the end of December this year.

Taking into account this critical situation, we would like to kindly ask you to transfer a donation in the amount of 11220 grivna to the Kiev Children and Youth

Support Center for purchasing 165 doses of Inluvac Vaccine for the residents of the Tsurupinsk Children Home.

Considering the urgency of this matter, we will highly appreciate your soonest response.

With respect and gratitude for your continuous support,

Tatiana G. Kniagnitska
Children's Home Director

Questa è la richiesta che abbiamo ricevuto dall'orfanotrofio di Tsurupinsk, e visto l'urgenza e l'entità del problema (sono tutti bambini con problemi fisici, già debilitati e provati da molteplici problemi) abbiamo subito finanziato l'acquisto dei vaccini che lo Stato ucraino non avrebbe fornito.

Il costo totale è stato di € 1.217 (milleduecentodiciassette)
